## ABOUT THE BREWER

Thoughtful design and abundant personalization options make the Brewer plan hard to resist. The main floor offers a great room, a dining area and a large kitchen with a center island. You'll also find a private study near the entryway. The second-floor master suite showcases an oversized walk-in closet and a large attached bath with double sinks and a separate shower and soaking tub. Two additional bedrooms, a loft, a laundry and another bath complete the upstairs. Personalize this home with a California room on the main floor, a fourth bedroom and third bath in lieu of the study, a fifth bedroom and fourth bath in place of the loft, gourmet kitchen features, a walk-in shower at the master bath and more.

\*This information is presented for education purposes only. The HERS index for a confirmed rating will be determined by a third-party HERS rater based on data gathered from on-site observations and, if required, testing of rated features for a home as featured, optioned, located, oriented and/or built.

+Standard new home is based on the RESNET® Reference Home definition with a HERS® index of 100 (based on the 2006 International Energy Conservation Code).

++Typical resale home is based on the U.S. Department of Energy definition with a HERS® index of 130.

^RESNET® has developed the HERS® index to indicate the comparative efficiencies of homes. It is no guarantee that energy efficiencies will be achieved.

Floor plans and renderings are conceptual drawings and may vary from actual plans and homes as built. Options and features may not be available on all homes and are subject to change without notice. Actual homes may vary from photos and/or drawings which show upgraded landscaping and may not represent the lowest-priced homes in the community. Features may include optional upgrades and may not be available on all homes. Square footage numbers are approximate and are subject to change without notice. **What's a HERS® Index?** HERS stands for Home Energy Rating System, a system created by RESNET® to measure home energy efficiency.<sup>^</sup>  
 A Projected HERS index or rating is a computer simulation performed prior to construction by a third-party HERS rater using RESNET-accredited rating software, rated feature and specification data derived from home plans, features and specifications, and other data selected or assumed by the rater. The projected HERS index is approximate and is subject to change without notice. Actual results will vary.
