What's a HERS® index? HERS stands for Home Energy Rating System, a system created by RESNET® to measure home energy efficiency.^ A projected HERS index or rating is a computer simulation performed prior to construction by a third-party HERS rater using RESNET-accredited rating software, rated feature and specification data derived from home plans, features and specifications, and other data selected or assumed by the rater. The projected HERS index is approximate and is subject to change without notice. Actual results will vary.
