Bedrooms: 4 - 5
Garage: 2-car
Plan Number: W603

You can't help but admire the Bradford plan's open main-floor layout, which includes a large dining room, an inviting great room and a gourmet kitchen with a walk-in pantry, center island and optional multi-slide doors leading onto a generous covered patio. You'll also appreciate a quiet study, which can be optioned as an extra bedroom, and a convenient mudroom off the 2-car garage. The upstairs includes a laundry, a roomy loft and a lavish master suite with dual walk-in closets and an optional deluxe bath.

MASTER BATH**
**OPT. MASTER BATH W/
WALK-IN SPA**

What's a HERS® Index? HERS stands for Home Energy Rating System, a system created by RESNET® to measure home energy efficiency.^
A Projected HERS index or rating is a computer simulation performed prior to construction by a third-party HERS rater using RESNET-accredited rating software, rated feature and specification data derived from home plans, features and specifications, and other data selected or assumed by the rater. The projected HERS index is approximate and is subject to change without notice. Actual results will vary.

*This information is presented for education purposes only. The HERS index for a confirmed rating will be determined by a third-party HERS rater based on data gathered from on-site observations and, if required, testing of rated features for a home as featured, optioned, located, oriented and/or built.
+Standard new home is based on the RESNET® Reference Home definition with a HERS® index of 100 (based on the 2006 International Energy Conservation Code).
++Typical resale home is based on the U.S. Department of Energy definition with a HERS® index of 130.

^RESNET® has developed the HERS® index to indicate the comparative efficiencies of homes. It is no guarantee that energy efficiencies will be achieved.
