The entry of the ranch-style Delaney floor plan leads to a generous great room and kitchen with walk-in pantry and central island. The master bedroom is

located away from the other bedroom for added

privacy. A quiet study, convenient laundry, formal dining room and covered patio complete the design.

What's a HERS® Index? HERS stands for Home Energy Rating System, a system created by RESNET® to measure home energy efficiency.^ A Projected HERS index or rating is a computer simulation performed prior to construction by a third-party HERS rater using RESNET-accredited rating software, rated feature and specification data derived from home plans, features and specifications, and other data selected or assumed by the rater. The projected HERS index is approximate and is subject to change without notice. Actual results will vary.

[^]RESNET® has developed the HERS® index to indicate the comparative efficiencies of homes. It is no guarantee that energy efficiencies will be achieved.
