

## Symphony at Cadence LAWSON

Elevation A

EGUAL HOUSING OPPORTUNITY

## Available elevations:

Elevation A

Approx. square feet: 2,300

Stories: 2

Bedrooms: 3 - 5

Garage: 2-car

Plan Number: L609

The main floor of the Lawson plan offers a formal dining room, a spacious great room and a quiet study that can be optioned as an extra bedroom with full bath. You'll also appreciate the open kitchen with center island. Upstairs, you'll find a convenient laundry, a versatile loft and three generous bedrooms, including the elegant master suite with optional sitting room. Personalize this plan with an optional covered patio, deluxe master bath and more.

Take a look: 100 = Standard new home<sup>+</sup> 130 = Typical resale home<sup>++</sup>

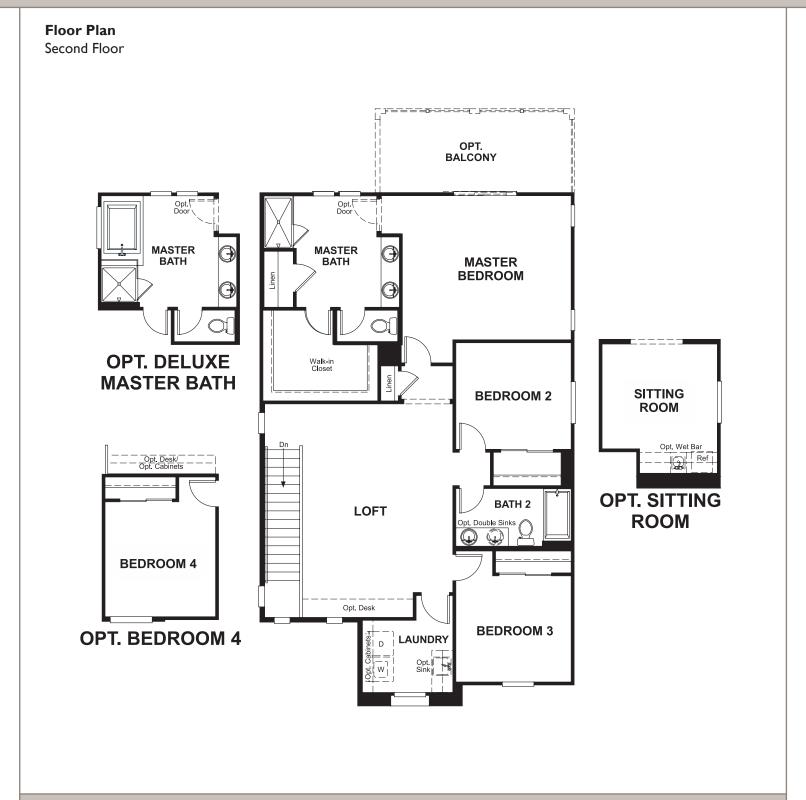

The lower the number, the better! Refer to the RESNET® HERS index brochure or go to www.RESNET.us for details.

\*This information is presented for education purposes only. The HERS index for a confirmed rating will be determined by a third-party HERS rater based on data gathered from on-site observations and, if required, testing of rated features for a home as featured, optioned, located, oriented and/or built.

+Standard new home is based on the RESNET® Reference Home definition with a HERS® index of 100 (based on the 2006 International Energy Conservation Code).

++Typical resale home is based on the U.S. Department of Energy definition with a HERS® index of 130.

Projected Rating Based on Plans – Field Confirmation Required

What's a HERS® Index? HERS stands for Home Energy Rating System, a system created by RESNET® to measure home energy efficiency. A Projected HERS index or rating is a computer simulation performed prior to construction by a third-party HERS rater using RESNET-accredited rating software, rated feature and specification data derived from home plans, features and specifications, and other data selected or assumed by the rater. The projected HERS index is approximate and is subject to change without notice. Actual results will vary.

<sup>^</sup>RESNET® has developed the HERS® index to indicate the comparative efficiencies of homes. It is no guarantee that energy efficiencies will be achieved.
